

Highlights on capabilities

RuB CAPABILITIES	
Alloys	traditional brass, leadfree brass, dezincification-resistant brass, aluminum
Sizes	1/8" thru 4"
Axiality	We can machine in 5 axial directions, any diagonal direction
Production test	Inline, self-calibrating testing
Assembly test	100% in-line inspections of all components
Seal test	Air test, by automated equipment Water test for statistical control
Packaging test	Quantity control through weight on each box packed
QA	ISO9001-2008
FMEA	Available upon request
Subcontract	Available upon request

MACHINES RANGE
6-spindle and 8-spindle lathe machines with automatic loaders
Transfer machines with automatic loader
CNC vertical and horizontal spindle machines
Automatic valve assembly and testing equipment 1/8" thru 4"
Automatic handle assembly and testing equipment
Robotized balls machining with diamond ultra finish
Miscellaneous equipment to produce internal tools and prototypes
Packaging line
All equipment subject to maintenance program
